Amerilab Technologies, Inc. Receives GMP for Sport™ Registration from NSF International

(Minneapolis, MN) – Amerilab Technologies, Inc.®, a leader in the development and manufacture of effervescent dietary supplements, nutraceuticals and sports supplements, is pleased to announce Good Manufacturing Practices (GMP) Registration under the NSF International Athletic Banned Substances program, known as GMP for Sport™.

Adding to its recent GMP Registration through NSF International's Dietary Supplement Certification program, Amerilab continues its commitment to manufacturing the highest quality supplements under the most stringent quality standards.

The NSF GMP for Sport™ program verifies that the product is manufactured in a GMP Registered facility and the facility does not use substances banned by major sports organizations. This is done through announced facility and supplier inspections.

"Amerilab Technologies, Inc. was recently GMP registered by NSF," said Edward Wyszumiala, General Manager, NSF's Dietary Supplement Programs. "The additional GMP for Sport™ registration further demonstrates their outstanding commitment to the sports and nutritional product/supplement industry. I congratulate Amerilab on achieving this milestone."

Amerilab Technologies, Inc.® specializes in the development, manufacture and packaging of effervescent tablets and powders. With extensive experience in formulation of various dietary supplements, sports supplements, nutraceuticals and other specialty applications, Amerilab Technologies is the U.S. leader in effervescent dosage forms.
